Netherlands Journal of Agricultural Science

Volume 34 (1986)

Subject index

This index lists the key words given in the headings of the papers. A number refers to the first page of the paper involved

acid rain 371
acid-base balance 109
acidification, soil 371
aerial photography 493
Africa, West 339
age
— at first farrowing 427
— at first mating 427
ageing characteristics 493
— intensification 485
— marketing 301
— products 227
Alfisols 91
aluminium 185
ambient temperature 173
amino acids 119
ammonia 199
ammonium 371
analysis, chemical 449
antagonist 263
anthesis 469
anticarcinogens 395
aphid 488
aquifer 230
argillic horizon 91
arsenic 129, 145
behaviour 233
bio-availability 361
biological activity 44i
black peat 103
blood 109
body weight 501
breeding, plant 395
brown soils 91
bulblet regeneration 217
cadmium 129, 145, 437
calves, veal 233
carcicogens, natural 395
carrying capacity 339
cell wall constituents 119
cellulose 119
chemical analysis 449
chlorosis, lime-induced 371
clay illuviation 441
collaborative study 449
compaction of soil 57
compounded feeds 437
computer model 497
concentrate(s) 457
— protein 199
conservation, forest 485
consumer behaviour 227
control, integrated 263
cows, dairy 129, 457
crown
— morphology 493
— shyness 493
crude
— fibre 501
— protein 116
culling rate 427
cultivar 57
cyst nematode 263
dairy cows 129, 457
damage 488
dead trees 112
decalcification 441
degradability 199
degradation, protein 119
development 1
digestibility 501
diurnal variation 173
drought 469
— stress 497
dry matter 25
dwarf goats 413
economy 225
enemies, natural 263
evaporation, soil water 75
explants, floral stem 217
farming systems 485
fatty acids, volatile 199

feed(s)
—, compounded 437
— intake 413
— selection 412
feeding level 501
fermentation, ruminal 457
fertility 413
fertilization
—, nitrogen 15
—, potassium 503
first mating, age at 427
floral stem explants 217
fluvial deposits, Late Weichselian 441
foliar nutrients 49
food
— production, stabilization of 193
— products 227
forage production 25, 37
forest conservation 485
fossil soil formation 441
genotype 49, 469
glassiness 57
Glyxine max
goat, dwarf 413
grass 25, 37
grazing 457
group housing 233
growth
— rate 413
— stage 1, 67
haemoglobin 109
heather 103
heat stress 469
hemicellulose 119
heterogeneity 230, 361
housing
—, group 233
—, individual 233
— system 233
ICP-AES 185
illuviation, clay 441
impedance, mechanical 155
in sacco 116
integrated control 263
intensification, agricultural 485
intercropping 193
interface 230
interlaboratorial variability 449
in vitro 217
ionic balance 371
Ipomoea aquatica 15, 503
iron 185
Ivory Coast 112
kangkong 15, 503
kernel set 469
lactate 109, 199
lactation length 427
Lactuca sativa 57
lambs 145
land-use 449
— planning 339
—, sustained 485
Late Weichselian
— fluvial deposits 441
— Meuse terraces 91
lead 129, 145, 437
leaf
— area, specific 25
—vegetable 15, 503
light
— intensity 49
— interception 25
lignin 116, 119
lime-induced chlorosis 371
lucerne 25, 37
Luvisols 91
Lycopersicon esculentum 49
magnesium 103
maize 25, 37, 67, 155
marketing
—, agricultural 301
— management 301
— theory 301
meat production 413
mechanical impedance 155
mercury 129, 145
Meuse terraces, Late Weichselian 91
microbial protein synthesis 119
micromorphology 441
model 1
—, computer 497
modelling 75
modulating factors 395
mortality 112
mutagenicity 395
natural
— carcinogens 395
— enemies 263
— resources 339
NDF 116
Nerine bowdenii 217
nested sampling 106
night temperatures 49
nitrate 49, 371
— content 15
nitrogen 25, 49
— fertilization 15
— fixation 37
—, soil 37
— utilization 37

—yield 37
nutrition 57
nylon bag 116
organic acids 371
oxalate extraction 185
pathogen 263
pathological data 129
peat, black 103
periglacial environment 441
pH 103
—of the rooting medium 371
phenological scale 67
phenology 1
phosphorus 49, 185
photography, aerial 493
photoperiod 469
pig 109, 173, 225, 501
Piptadeniastrum africanum 493
Plaggepts 91
plant(s)
—breeding 395
—growth 371
—, ionic balance of 371
—tissue 449
plantlet formation 217
podzols 106
pollen shedding-silking interval 469
pollination 469
potassium fertilization 503
potato 263
pregnancy diagnosis 225, 427
production level 488
productivity index, sow 427
protein
—, concentrate 199
—degradation 119
—synthesis, microbial 119
quality
—attributes 227
—indicators 227
—perception 227
—risks 227
radiation 57
rain forest, tropical 112
ratoon method 503
rearing intensity 427
repeat mating 427
residual effects 37
resources, natural 339
retention time 119
rice 193
root
—growth 497
—/shoot ratio 25
rooting medium, pH of the 371
rumen 116
—parameters 199
ruminal fermentation 457
sacco, in 116
sampling, nested 106
sandy oil 103
sedimentation 91
senescence 493
shedding-silking interval, pollen 469
shifting cultivation 485
shoot
—growth 497
—ratio, root/ 25
silking 469
simulation 1, 488
